The rimless sanitary ware is extremely hygienic and easy to clean. Their smooth surface can be cleaned easily and efficiently without the use of strong detergents. Eliminating the inner edge of the sanitary ware, under which difficult-to-remove bacteria usually accumulate, guarantees a higher level of sanitary hygiene and safety. The profile of the cup directs the flow of water in such a way that the entire internal surface is thoroughly rinsed. Dirt and germs have no room to accumulate thanks to the removal of the inner edge and thorough rinsing of the entire bathroom fixture.
